Next 2 weeks

1 day Hackathon : Agent Orchestrator

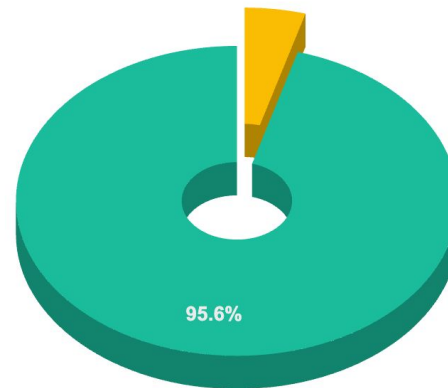

User Acceptance Test

Automated vs. Not Automated
(Conversation level)

Test Sample: 1226 Conversations
Recommended Acceptance Criteria: 70%+

Unknown Rate
(Message level)

Test Sample: 2879 Messages
Recommended Acceptance Criteria: 85%+

Support Metrics:

Published intents no actions: 0

Missing Variables: 0

Missing Content: 2 (Actioned)

Sally SWOT

Strengths

Prediction accuracy in a much better place, no maintenance need for same quality, less maintenance for adding intents.

Weaknesses

“Wall of text” for certain responses, tackling follow-up questions

Opportunities

Agentic Actions will solve both weaknesses. Also add transactional usecases for high volume intents.

Threats

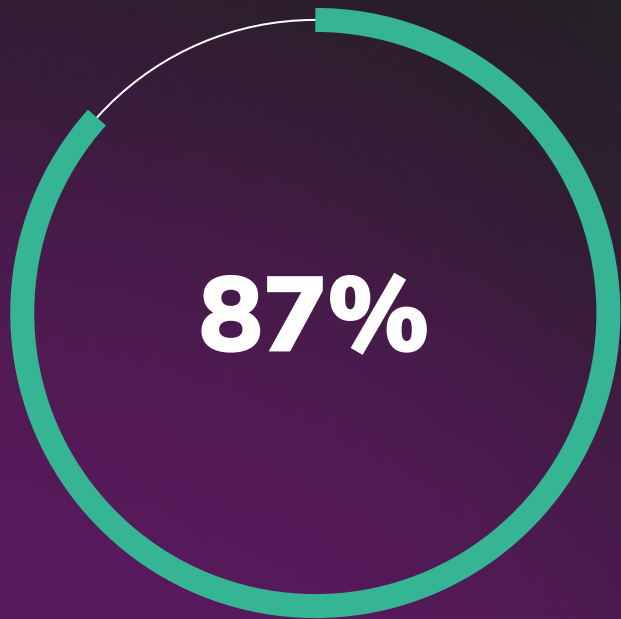

Approval process for changing actions

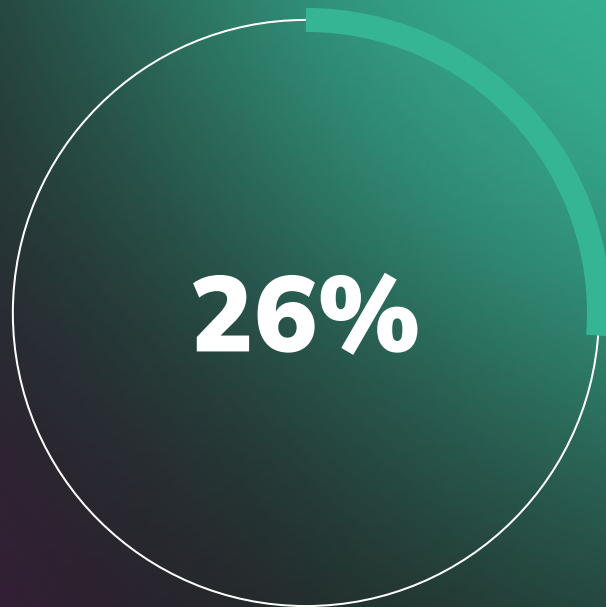

*“A 2 week approval chain to is 2 weeks
of customers surely getting the
incorrect answer!”*

Agentic Actions with Boost

Customers with LLM in production

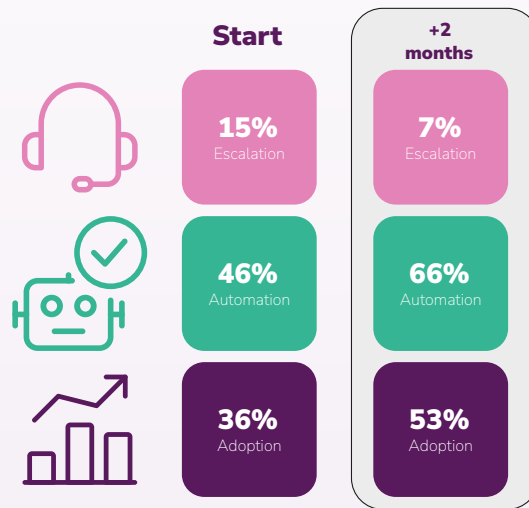

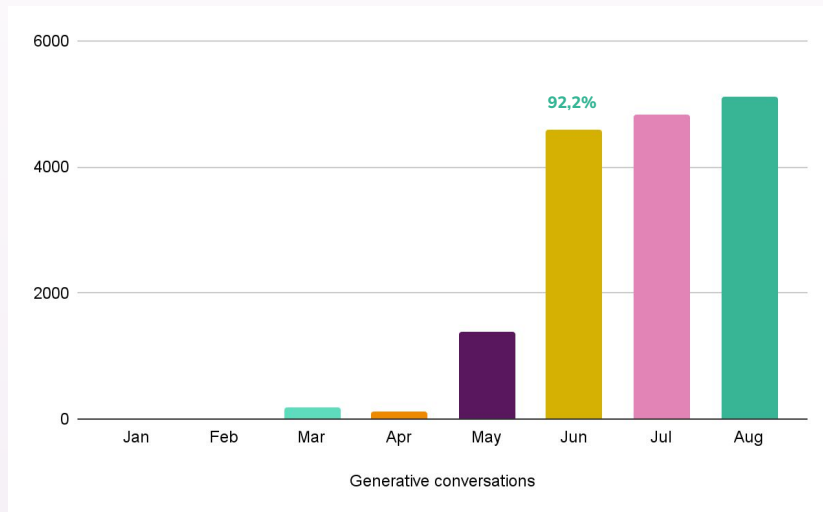

of all Conversations are Agentic

Rapid adoption of Agentic Actions

An interesting before/after success story

From low (<5%) Agentic actions to high (>90%) in 2 months:

1. Human handovers went from 15% to 7%.
2. Automation increased by 20 percentage points, from 46% to 66%.
3. Adoption across all channels has gradually increased from 36% to 53%.

Suggested next steps for Sally

1. Go Agentic (in parallel with 2&3)
2. Build Authentication to enable a personalised user experience
3. High Frequency transactional usecases, ex:
 - a. Account Balance
 - b. Transaction history
 - c. Reset PIN
 - d. Activate card

Benchmarking and conversation review

We see **top performing Internal AI Agents** have in common:

Employee
Satisfaction

CSAT Score

MSUFCU Gene results at a glance...

- ★ Internal virtual agent pilot launched in 10 days
- ★ Pilot involved group of 60 employees across branches
- ★ Employees were surveyed throughout the pilot
- ★ 100% employee approval after 4 weeks
- ★ 15,000 employee-to-employee interactions automated/ month
- ★ Gene conversation volume has increased to 20,000+/month

Expanding Gene's Capabilities

"What's absolutely critical with chatbot projects, is that you need people to interact with them to know if they're going to work well. If you send all this time working on a project and don't get it in front of your support team, you won't ever know if it succeeds." - Ben Maxim, CTO MSUFCU

"What's been really great about that is we've been able to allow our humans to do the really thoughtful work."

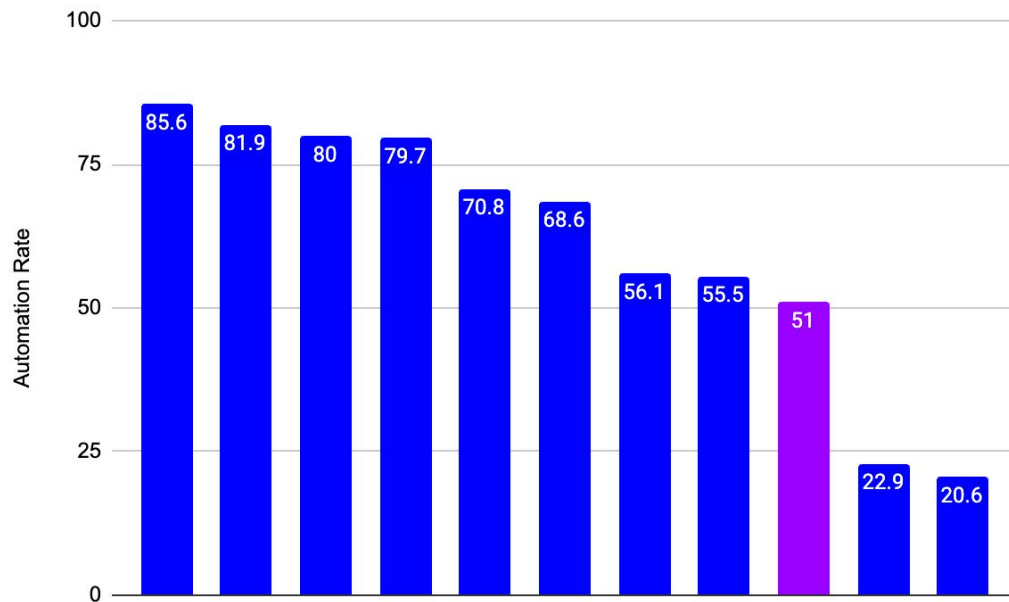

Ashleigh Ashbrook

MSUFCU's VP of Digital Service Experience

Benchmarking

Automation % - Financial Services Sector - Internal & 2nd Line Agents

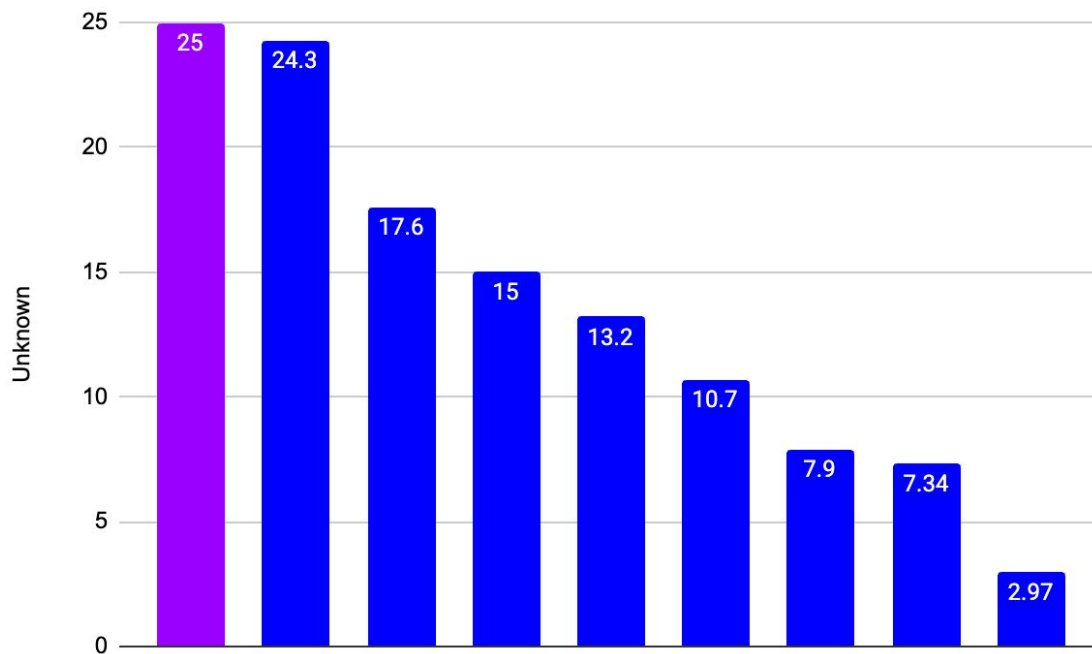

Automated = Percentage of conversations where the AI Agent helped the user completely, without having to involve a human. Based on AI Reviews only.

Benchmarking

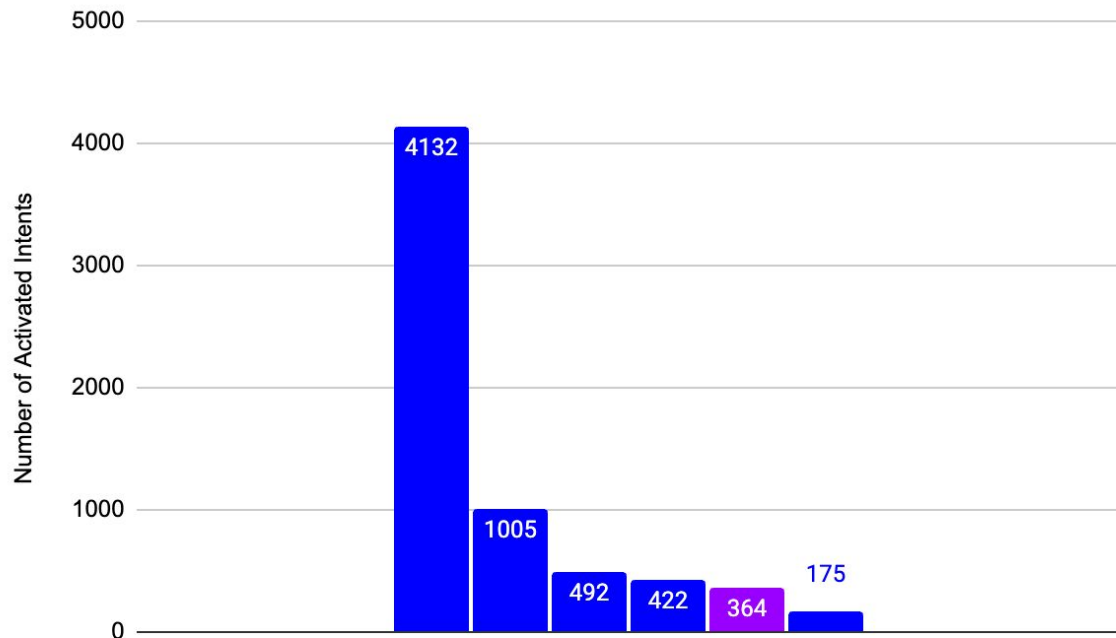

Unknown% - Financial Services Sector - Internal & 2nd Line Agents

*Unknowns = Percentage of messages that could not be predicted to an intent by the VA.
Stats are from last 7 days*

Conversation Review Results

Measuring method: 100 Conversations Reviewed

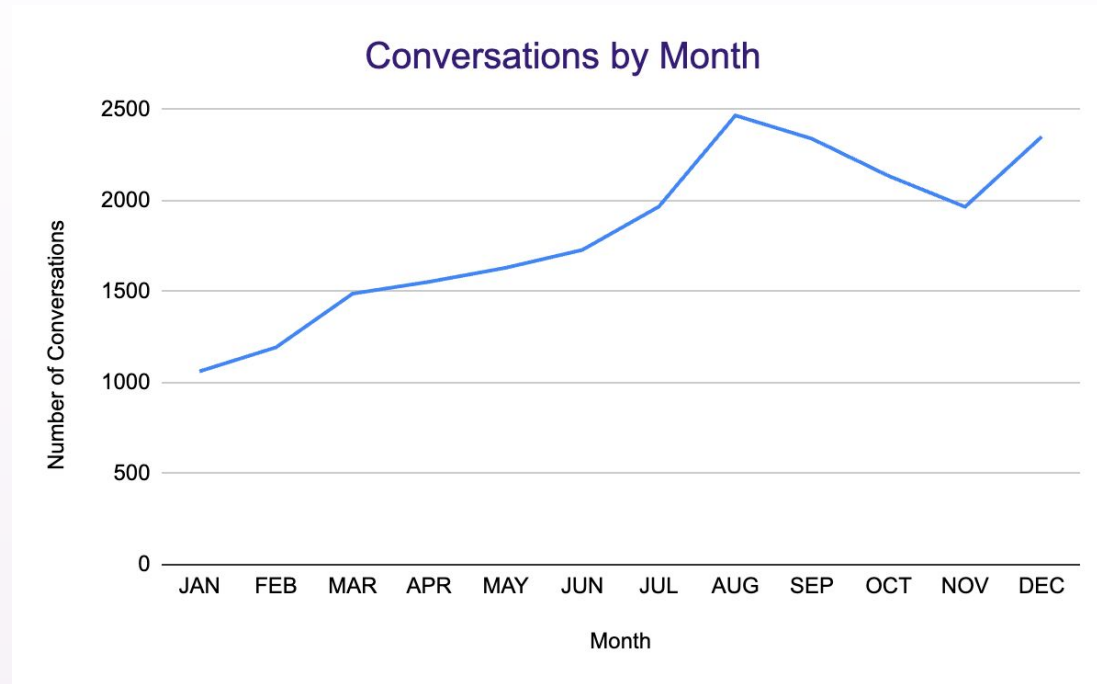

Measuring period: Month of November, 2025

Methodology: Starting from the beginning of the month, count every 5 conversations

	May	Dec	Avg	Target
Escalation Rate	0%	7%	45%	15%
Automation Rate	66%	51%	45%	75%
Resolution Rate	66%	58%	88%	90%
CSAT	n/a	n/a	45%	50%
Unknown %	25%	25%	12%	<10%

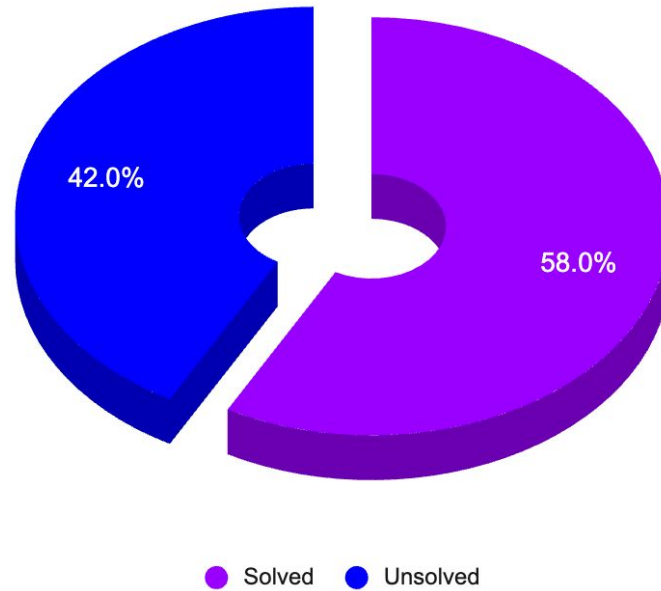

Link Conversations

Link's conversation AI chat volume increased by 132% from January - August 2025

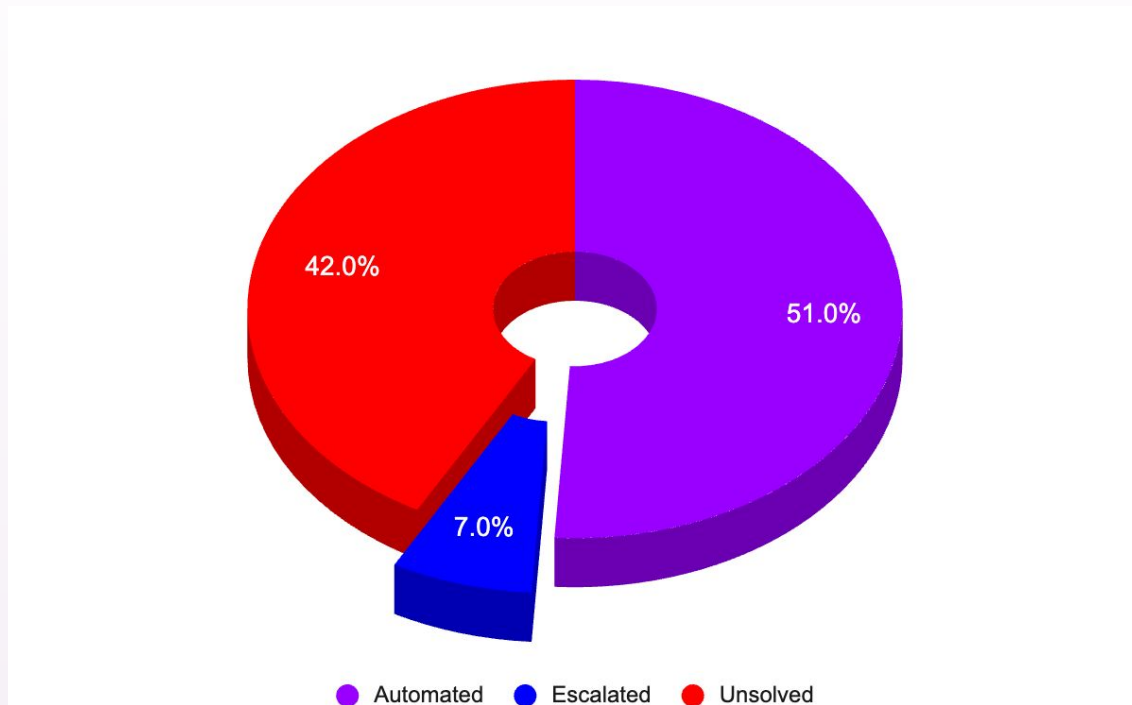

Quality of service

Solved vs. Unsolved

It's the automated conversations that count

Conversation Outcomes

Conversation Build Report - H1 2025

H1 2025	Number of Conversations	Answered	Not built
January	534	220	197
February	1191	505	449
March	1488	668	530
April	1553	727	569
May	1631	735	642
June	1727	797	713

Conversation Build Report - H2 2025 & 2026

H2 2025	Number of Conversations	Answered	Not built
July	1967	896	815
August	2468	1140	939
September	2340	1171	1041
October	2136	1040	939
November	1966	1008	838
December	2351	1165	1098

2026	Number of Conversations	Answered	Not built
January	2371	1154	1133

branch

First, have you verified the customer's identity?

yes

15:05:42

Mobile wallet branch

- Generated response

Great! Now, ask the customer to open the Wallet app on their device. Then, have them select "Debit or Credit Card" and tap "Continue." Let me know when they're ready for the next step.

15:05:47

Canadian Checks

Do we accept Canadian checks?

Yes, we do accept Canadian checks. Have you verified the customer's identity?

Yes

Great! Will the customer be depositing the check into a Savings account or another type of account?

Checking

For a Checking account, use a Special Deposit Ticket with Transaction Code 07. Remember to stamp or write "EX" if a discount is applied. Need help with the exchange rate or hold placement?

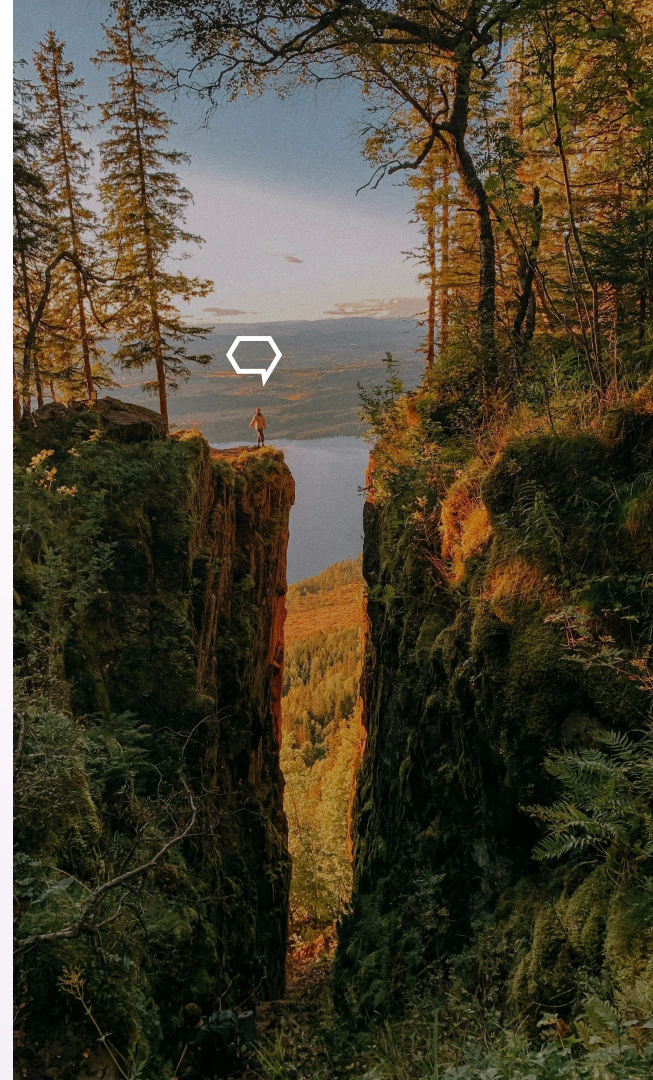

Yes

You can find the current exchange rate in SharePoint under Operations > Deposit Operations > Rate > Canadian. For the hold, it should be placed for a minimum of three business days. Anything else you'd like assistance with?

CBNA Automation Goal Setting

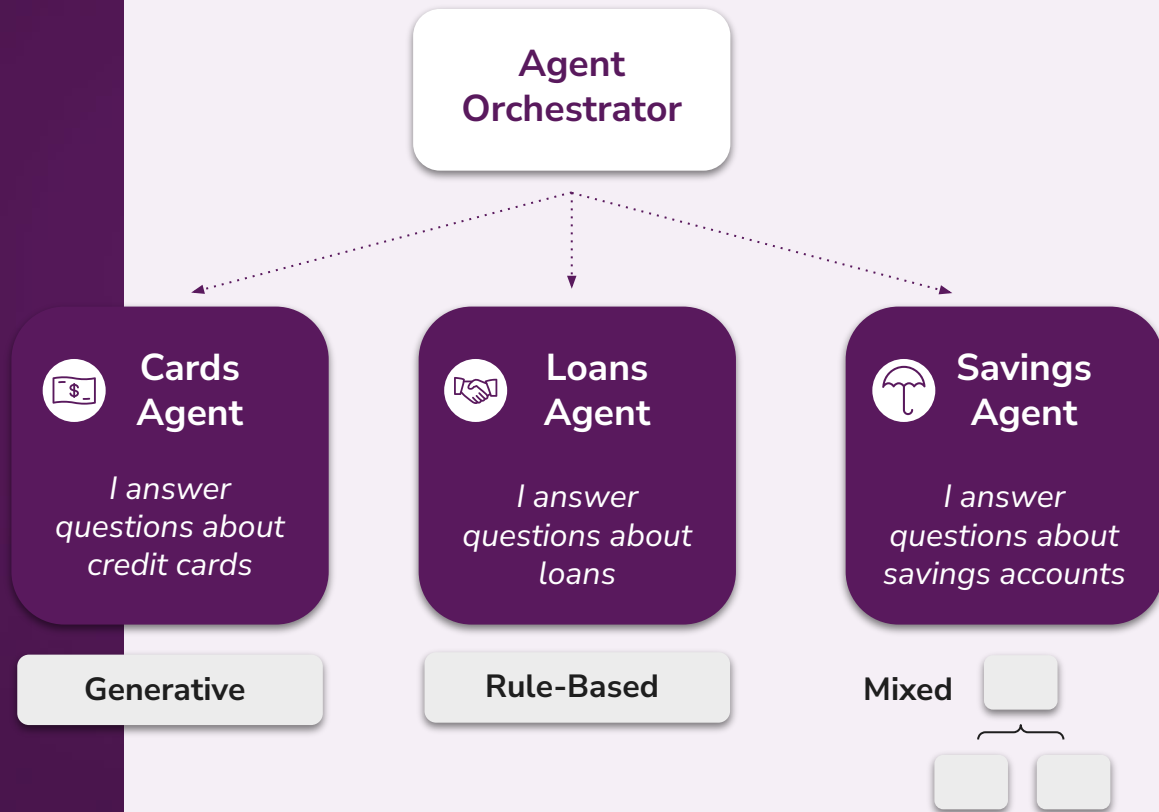

What is Agent Orchestration?

A system with an Agent Orchestrator and Agents

Where the Agent Orchestrator routes the conversation to the appropriate Agent

Based on descriptions of what topics each Agent handles

And Agents contain flows that you are used to today

Why Agent Orchestration?

Fluid agentic conversations

- ◆ Conversational bridge between topics
- ◆ Ability to ask follow up questions to clarify user needs
- ◆ No unknown system action triggers
- ◆ Contextual understanding
- ◆ Better topic switching
- ◆ Possibility to connect to external agents (later version)

With less setup required

- ◆ Fewer agents needed than intents
- ◆ The needs for training data and synonyms are replaced by agent descriptions
- ◆ Agent descriptions can be generated automatically
- ◆ No need for context topics

Orchestrator demo

CBNA Orchestrator hackathon

Why

Demonstrate how Agent Orchestrator can accelerate results for CBNA

Who

CBNA: Belord, Karen, Tyler
Boost: Suvi/Marie, Ellery

What

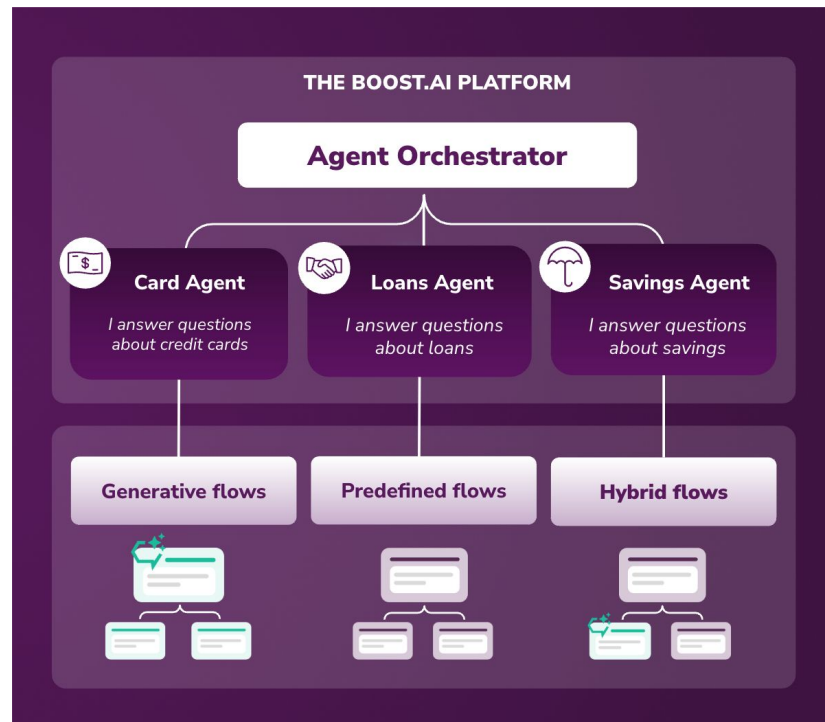

Hands on workshop to build and A/B test production ready flows vs current solution

Where

1 day, virtual, 23-27 March

CSAT with Boost

Methods to Measure CSAT

Voice

- NPS (rate from 1-5, 1-10)
- Qualitative survey

boost or 3rd party survey is available

Chat

- Thumbs up/down
- Smiley/Emoji - good/bad
- NPS (rate from 1-5, 10-10)
- Qualitative

boost or 3rd party survey is available

Trigger Capabilities

- Period of inactivity
- End of conversation
- At regular intervals
- After service delivery
- At the end of a transaction

Survey Channels

- Voice
- SMS
- What'sApp
- Email
- Chat

Driving a High CSAT

- End-End Automation
- Agentic Interaction
- API Integrations
- Voice quality & testing
- Conduct regular reviews
- Customer journey mapping
- Path to live agent

Link Promotion Recommendations

Action Items

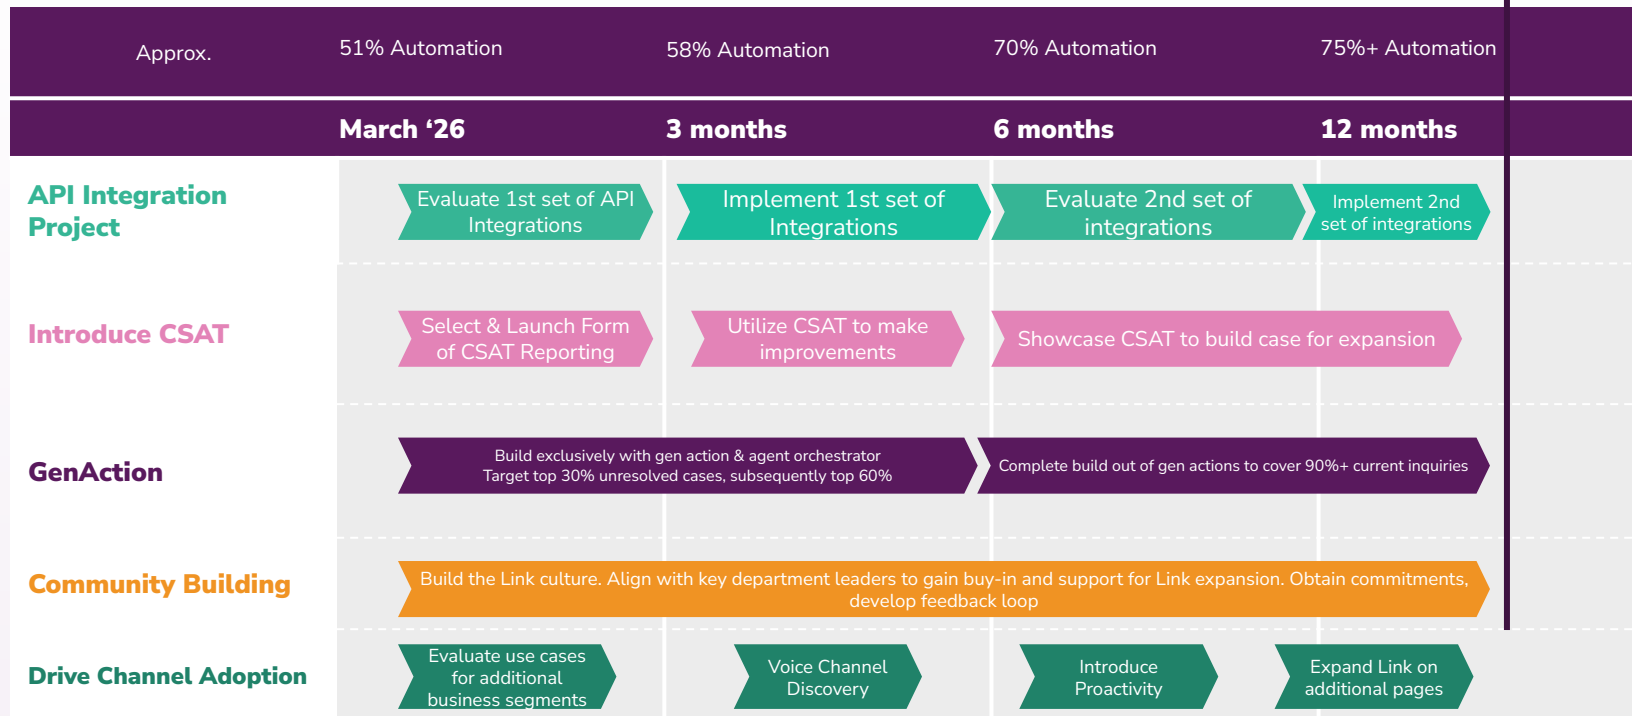

Comments

Completed

Promote Link during employee team and all hands meetings	During branch Cultivate meeting, Link was presented	In August 2025
Draft articles to be included with company newsletters	Department heads were approached about including Link in their newsletters	
Conduct discovery on the potential to introduce proactivity	AI Trainer Team will evaluate and prioritize accordingly	
Promote Link on all key intranet destinations and corporate web pages	Page dedicated in SharePoint to Link, including the knowledge and employee testimonials. Image of Link included in email signatures	Ongoing
Place bulletin board in key office locations introducing Link	AI Trainer Team will evaluate and prioritize accordingly	
Set up focus groups from a cross section of user groups	AI Trainer Team will evaluate and prioritize accordingly
