KPIs

How are we tracking?

KPIs

2nd line support success factors

Customer/user experience (CX/UX)

Your KPI:

1-5 (3.8) → Goal is 4

Market KPIs:

- Thumbs up %
- CSAT/NPS score
- Customer effort score

Efficiency

Your KPI:

No direct KPI

Market KPIs:

- AHT of calls
- Calls per agent
- First Call Resolution

Internal calls

Your KPI:

(PM: calls 20% reduction)

Market KPIs:

- Internal call reduction

Agent onboarding

Your KPI:

?

Market KPIs:

- Onboarding time
- Time to first call

Adoption

Your KPI:

?

Market KPIs:

- Engagement Rate
- Monthly traffic

Tryg's chatbot family

Intern chatbot

RoSa

"Automatiser backoffice processer for at reducere behovet for support og dermed sikre hurtigt og korrekt svar til kunden"

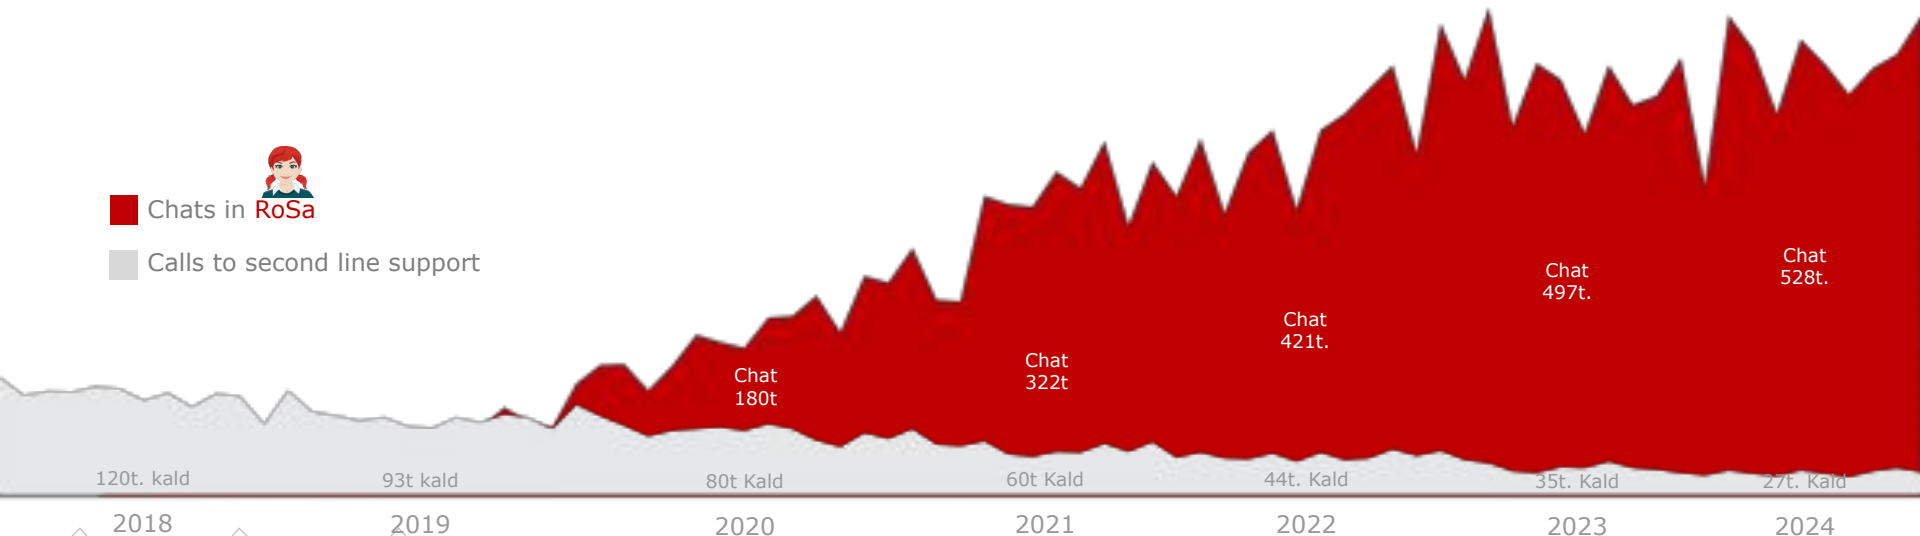

Tryg | 

Resultater:

- **Kald** til backoffice support -85%
- **Chats** dækker >90%
- **Support FTE** pr. salgs FTE - 6x

Benchmarking

Benchmarking

Unknown %, Oct 2025 (last 7 days)

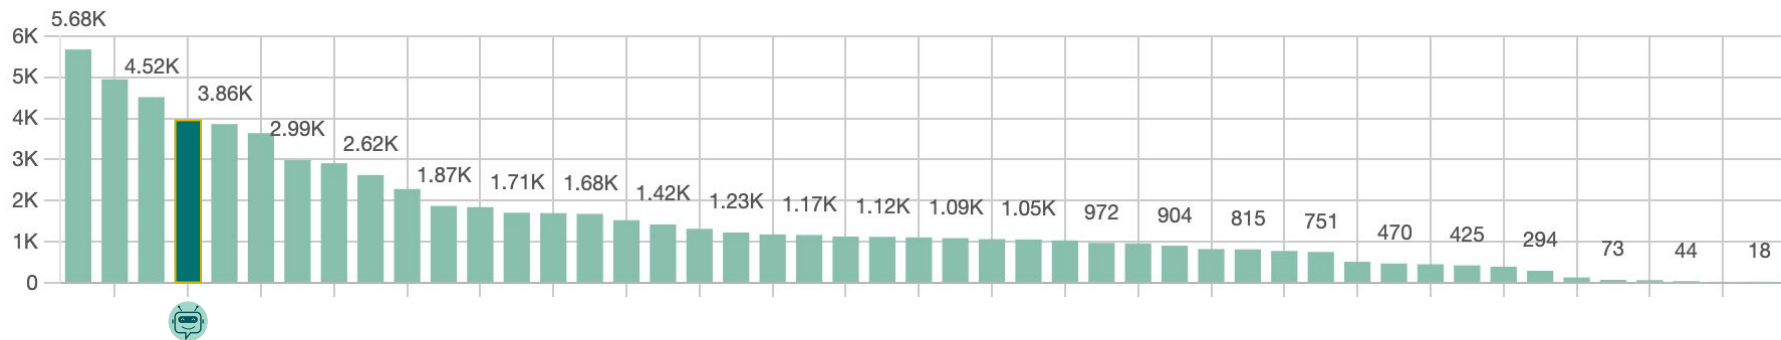

Unknowns = Percentage of messages that could not be predicted to an intent by the AI Agent.

 = Juno
 = Other internal solutions

Benchmarking

Intents #, Oct 2025 (last 7 days)

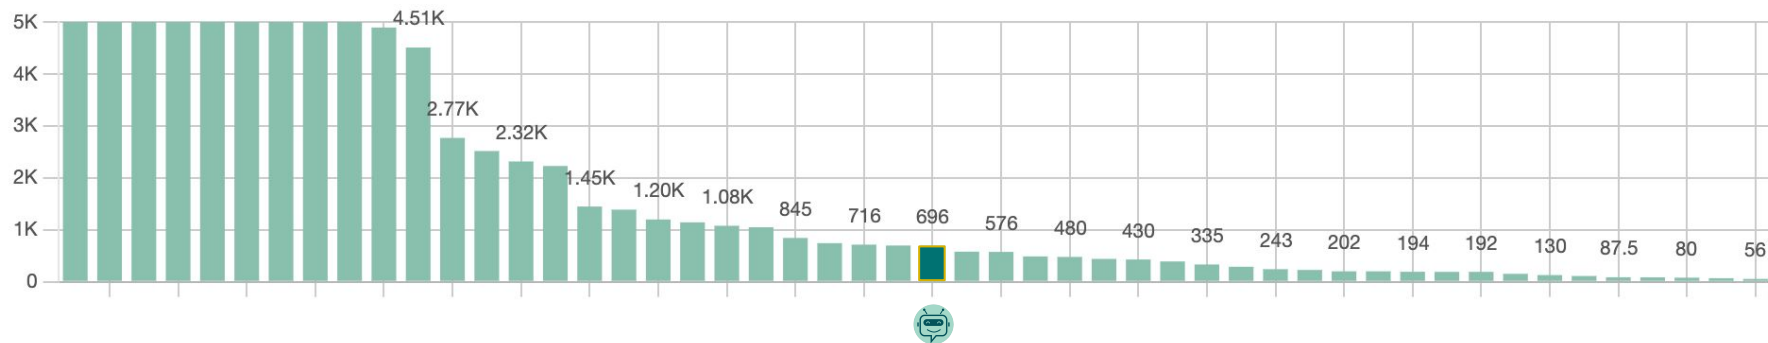

Intents # = Number of published intents.

 = Juno
 = Other internal solutions

Benchmarking

Severity score, Oct 2025 (last 7 days)

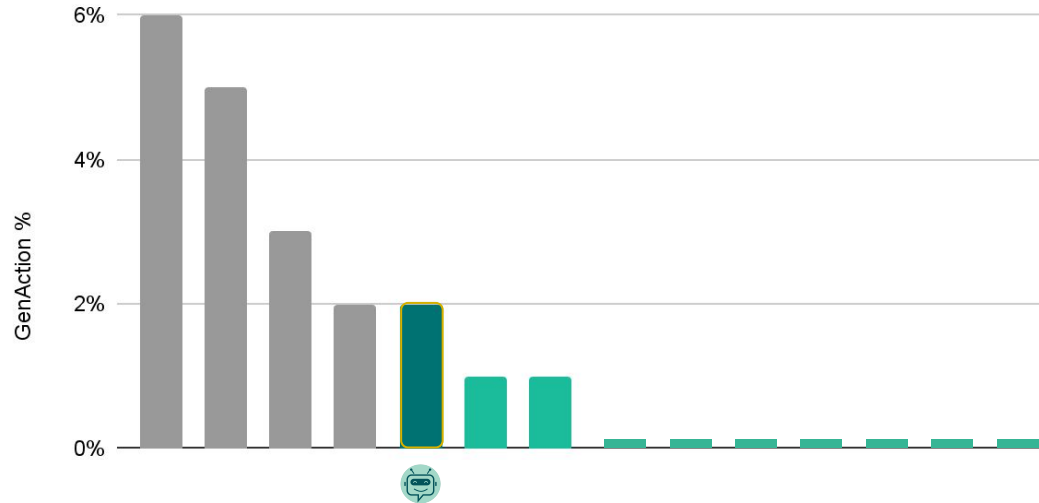

Severity score = The severity score reflects the total quality of your training data and synonyms, which is the basis of your NLU model. Lower is better!

 = Juno

 = Other internal solutions

Benchmarking

GenAction usage, Oct 2025 (last 30 days)

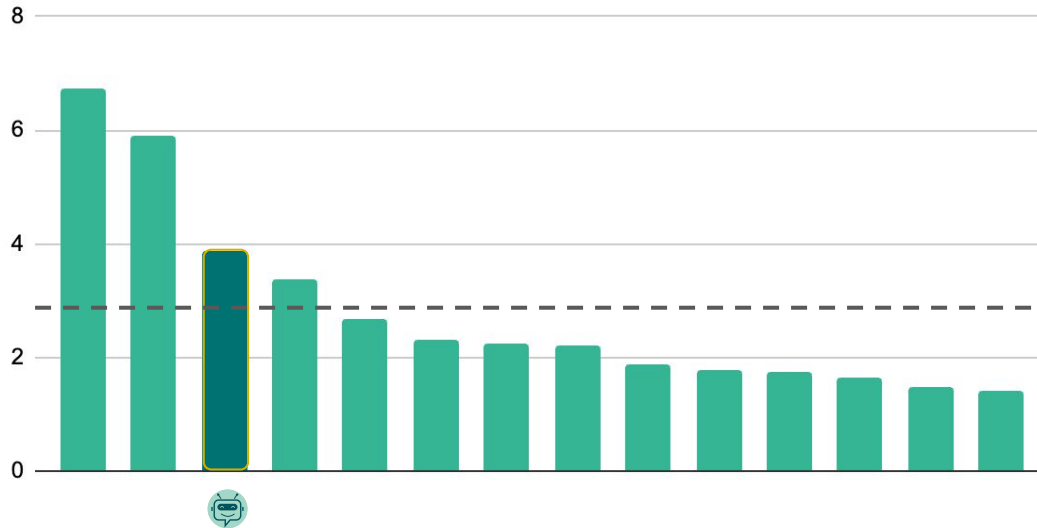

GenAction % = Proportion of Conversations using GenActions.

-  = Juno
-  = Other 2ndline solutions
-  = Other internal solutions w. multiple use-cases

Benchmarking

Messages per conversation, Oct 2025 (last 30 days)

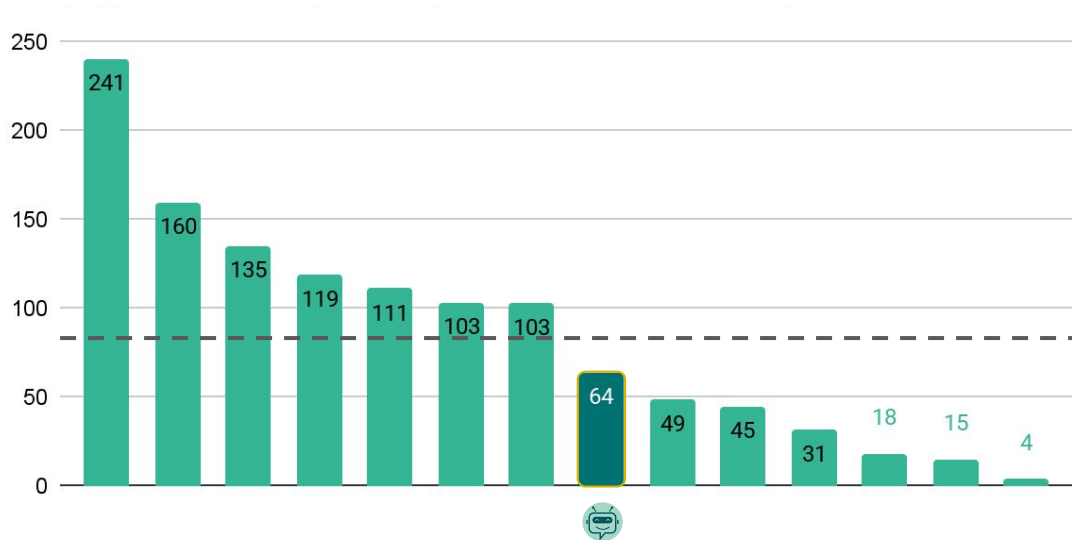

Messages per conversation = Average amount of user messages per chat conversation (i.e. not per session).

 = Juno
 = Other 2ndline solutions

Benchmarking

Engagement Rate, Oct 2025 (last 30 days)

Engagement Rate = Average monthly messages per intended user (FTE).

= Juno

= Other 2ndline solutions

Ideas

Engagement Rate

Engagement Rate

What is it?

Monthly engagement per intended user (FTE):

Monthly messages

of intended users

= Engagement Rate

Engagement Rate

Internal benchmarking

Global

$$\frac{80\,000 \text{ messages}}{1500 \text{ intended users}} = 53$$

Business unit 1

= 41

Business unit 2

= 57

Business unit 3

= 93

Adoption

Keys to success

- Internal marketing
- Stakeholder involvement (co-design)
- Availability & Visibility
- Use in Onboarding of new employees
- Daily / frequent relevance for users
 - Broad scope
 - News & updates
 - Effort-saving Transactions
- Kill old ways of finding “in-scope information” → one truth source
- Report and celebrate results
- Add some fun

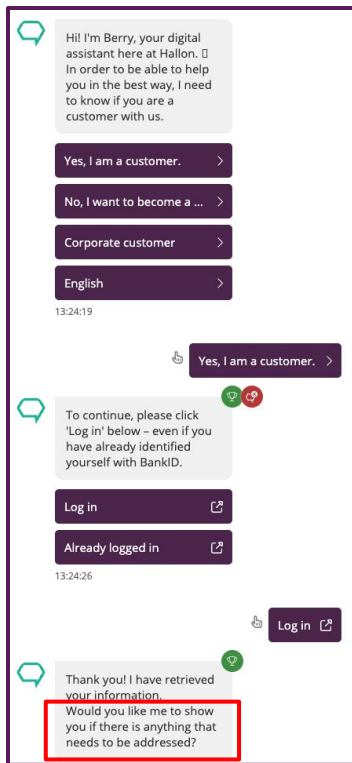

How can we use Generative AI in Juno?

Proactive support

Know your customer

Example:
Telecom

Example 4

Hi! I'm Berry, your digital assistant here at Hallon. In order to be able to help you in the best way, I need to know if you are a customer with us.

Yes, I am a customer. >

No, I want to become a ... >

Corporate customer >

Log in

Thank you! I have retrieved your information. Would you like me to show you if there is anything that needs to be addressed?

The following answers are AI-generated.

Hi there! 😊 I see that everything looks fine with your subscriptions – no freezes or unpaid invoices. What can I help you with today? 🤔

GenAI

Examples

How can we incorporate GenAI in Juno's user experience

- Small Topic rooms
 - Abbreviations
 - Explainer of key financial concepts
 - Calculations
 - Translator (e.g. Norwegian to English)
 - Drafting a message
 - Juno: Ask me anything
 - Fun room
- Product & Service FAQ
 - Insurance
 - Product Terms & Conditions
 - Prices
- Contact info
 - Department info
 - Opening hours
 - Office / branch locations
 - DNB Who's who
- Policy clarification
- "Next best offer"
- Proactive support

Inspiration

Background story

Industry: Financial Sector

Use case: Voice, 2nd line

Region: Denmark

Challenge

How can we achieve consistent, accurate call documentation from agents while reducing costs and maintaining current staffing levels?

Summary Returned

Title:
Change of car insurance

---Summary:---
The customer wanted to change their car insurance due to the purchase of a new car. We reviewed the coverages and removed roadside assistance. Agreed to start the new policy from [##insertdatehere##]. The customer was informed about the new premium and the deduction of the remaining amount from the existing policy.

Results

Cost Savings = Estimated ██████ M DKK saved annually

Reduced ACW

Agent Satisfaction

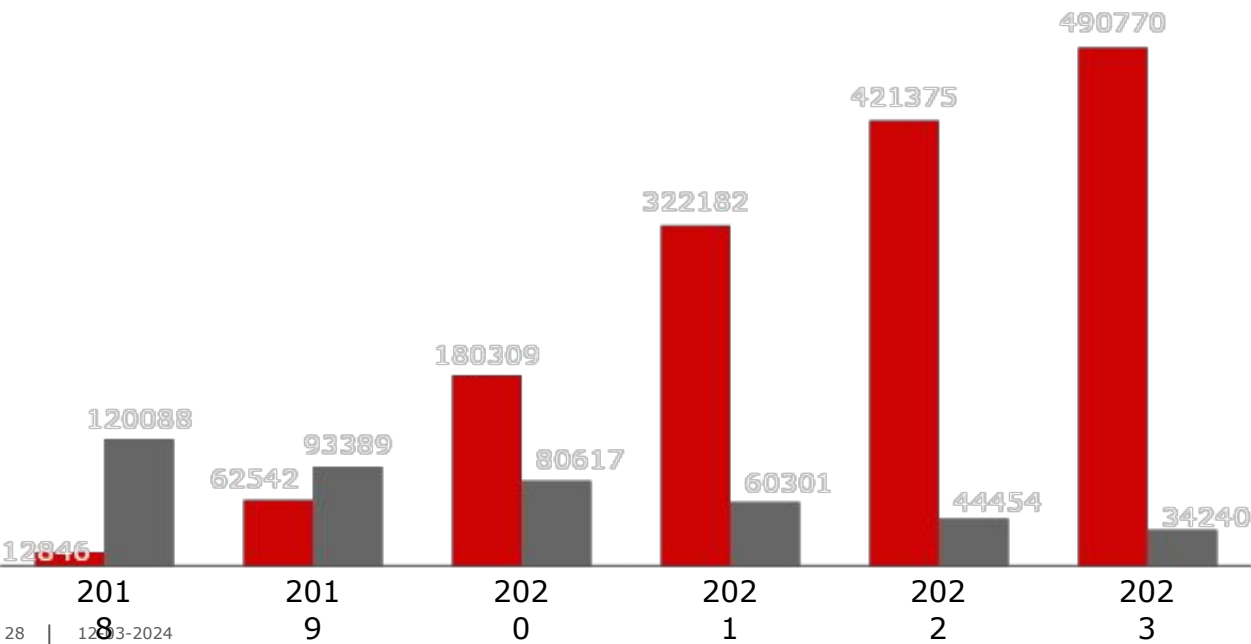

Consistent Documentation

Graph overview between chats for the VA and calls to backoffice

Chats in the
VA
Calls to
backoffice

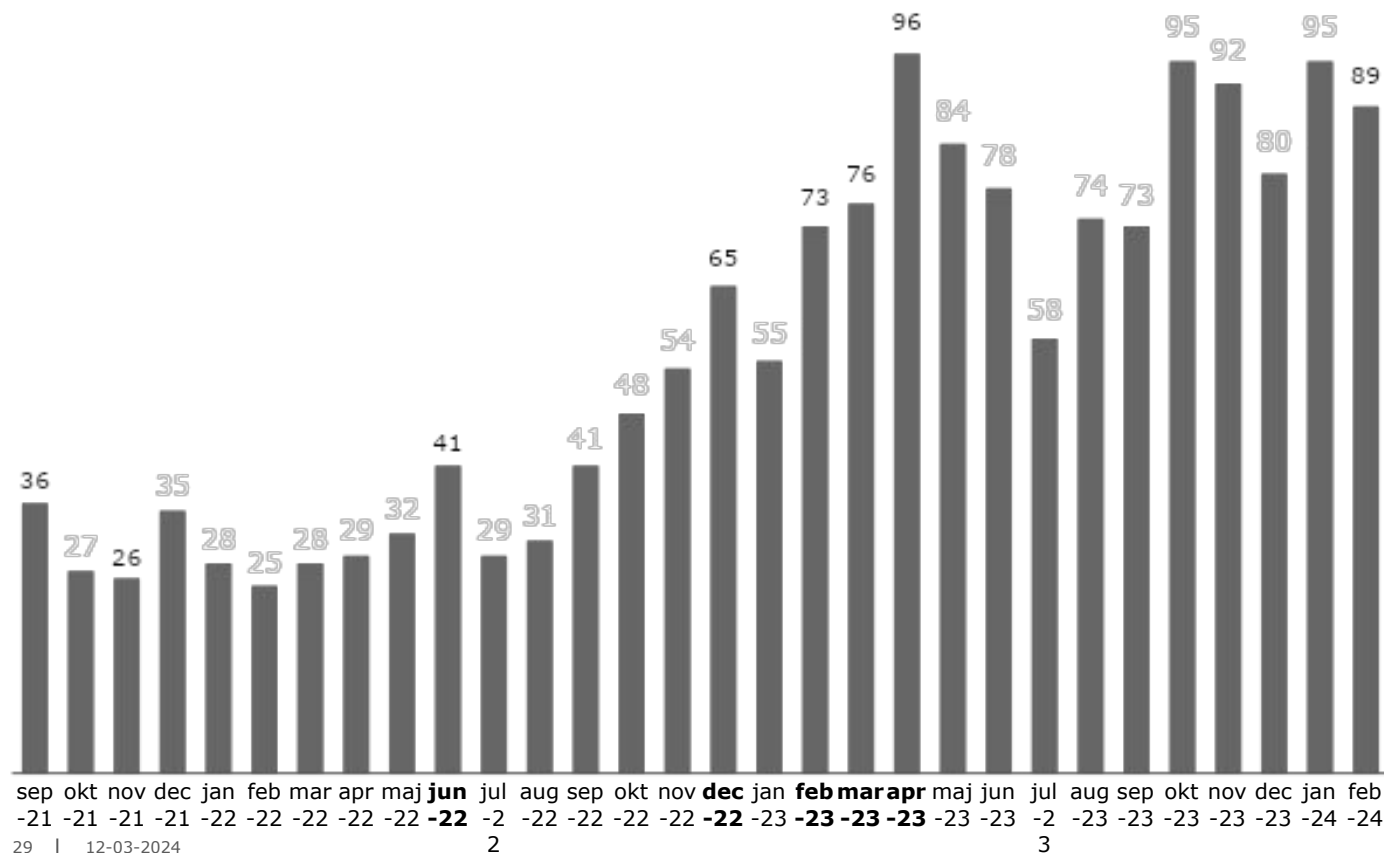

Backoffice have more time to be specialized
Previously the agent would call backoffice on every 11th call, thats now only at every 55th call

More efficiency
Preveiously we needed 1 back-office employee for every 12 salesagent. Today we need 1 for every 72 salesagent.

More self-service
The self-service rate for the salesagent has increased from 91% to 98,7% (improved first call resolution)

Users pr. month from go-live till now

Juni 2022
Started on feedback. Reaching out to the salesagents.

December 2022
Did the first christmas competition in the chatbot.

Februar & March 2023
Overtook the education of the chatbot for new hired salesagents

April 2023
The company was on meeting tour, highlighting the chatbot.

Upcoming Roadmap

Subject to change

12.6 (released)

- Voice Agents
 - boost.ai Gateway
 - Speech to Speech (beta)
- Voice testing studio (beta)
- Ambient & thinking sounds in calls
- Get Started Wizard

12.6.2 (late September)

- Voice analytics page
 - Calls with no user response
 - Average call duration
 - Total minutes used
- STT fine tuning for boost.ai gateway
 - Dictionary injection (Speechmatics)
- Real-time transcription in Agent test call
- Support for GPT-5
- European hosting for OpenAI

12.6.3 (late October)

- LLM generated API Connector code
- A2A channel integration
- Full screen chat panel (preview)
- Voice Gallery for boost.ai gateway
- Voice Analytics in Conversations overview
- Payments by phone with PCI compliance
- PDF upload without Adobe

12.7 (end of year)

- Agent Orchestration (beta)
- Rule based evaluations for Test Studio

12.7.x

- Call recordings in analytics
- Filler messages for boost.ai gateway

12.8

- Chat API v3
- Topic analytics
- User Permissions (custom user roles)
- Multi-channel conversations
- AI Companion for boost.ai knowledge base

- Voice
- Generative
- External systems
- Platform Management

Workshop

Questions

Topics

1. Hva avgjør at visse deler av dokumentet blir valgt ut eller vektlagt mer enn andre?
2. Er det mulig å sette opp en oversikt eller rangering som styrer hvilke svar eller tekster kunnskapsbasen skal vise først?
3. Kan vi bruke spesielle formateringsmetoder eller struktur for å gjøre det tydeligere hvilke deler av dokumentet som skal prioriteres?
4. Hvordan kan vi unngå at en automatisk rutine starter når vi søker etter ord og uttrykk i generativ Juno, hvis vi ikke ønsker at den skal aktiveres akkurat da?
5. Hvordan kan vi sørge for at Juno spør brukeren om mer informasjon hvis den ikke finner et klart svar, i stedet for å gjette på en intensjon med én gang? > scope description
6. Kan det være nyttig å få tilgang til et testpanel for å prøve ut avanserte funksjoner, som å lage en bot med full oversikt over efaktura eller lignende?
7. Vi har diskutert at Juno burde ha en innholdsfortegnelse eller oversikt over hva den kan svare på, spesielt for nye rådgivere. Kan vi bruke generative actions til å eksportere og strukturere hierarkiet, og så mate det inn i en generativ funksjon?
8. Er det lurt å flytte data til SharePoint nå, eller bør vi vente? Hva mener Boost er best?
9. Kan vi få mer informasjon om agentic AI og hvilke konkrete eksempler Boost ser for seg?
10. Finnes det funksjoner eller tester i Test studio som kan være relevante for oss?
