AI Chat Agent as First Line of Defense

An interesting before/after success story

A Nordic Telco and Media house goes from only human chat to AI Chat Agent as the first line of defense:

- Immediate drop of 65-75% of chat conversations to human agents
- Minor improvements to CSAT due to reduced avg waiting times
- Have since scaled the use of Chat & Voice in Norway, Sweden and Denmark

Accelerating Synergy

Automating CX During a Nordic Banking Merger

The Challenge

A digital-first Nordic bank acquired a legacy institution burdened by high operating costs and manual processes. The goal was to modernize the acquired bank's CX without increasing headcount.

The Solution

Using **boost.ai's Orchestrator**, the bank deployed a highly integrated AI Chat Agent as the first line of defense. This automated complex inquiries through deep system integrations from the start.

The Outcome

On Day 1, **manual chat traffic dropped by 54%**. Customer feedback has been overwhelmingly positive, proving that rapid automation drives both efficiency and satisfaction during a merger.

KEY METRICS

- ✓ **54%** reduction in manual chats
- ✓ **77.8%** CSAT
- ✓ **9-12** FTEs Automated
- ✓ **\$800-1.4m** Saved

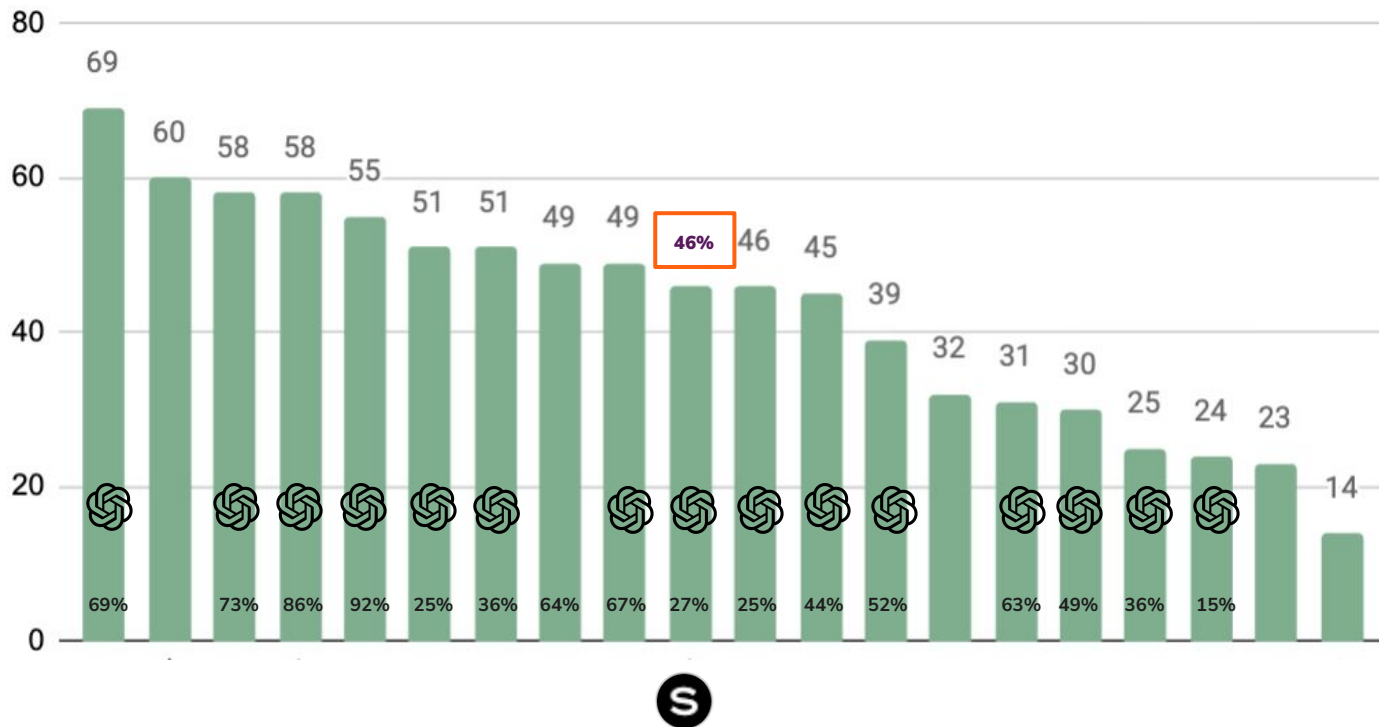

Performance KPIs & Benchmarking

Automation rate vs. Media & Telecom

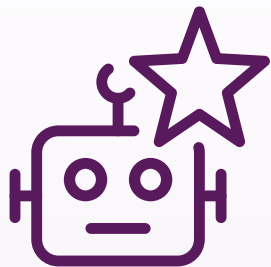

Agentic
conversations

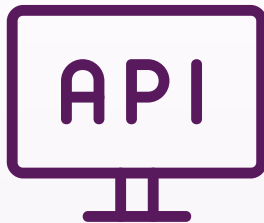

Adopting tech remains key to improve CX

Three core challenges we are helping our customers navigate

Agentic

Our customers acknowledge that CX can be enhanced with GenAI, but they want to maintain control.

Personalised CX

Personalised, transactional user journeys, where the end users are authenticated, are key to a more meaningful CX.

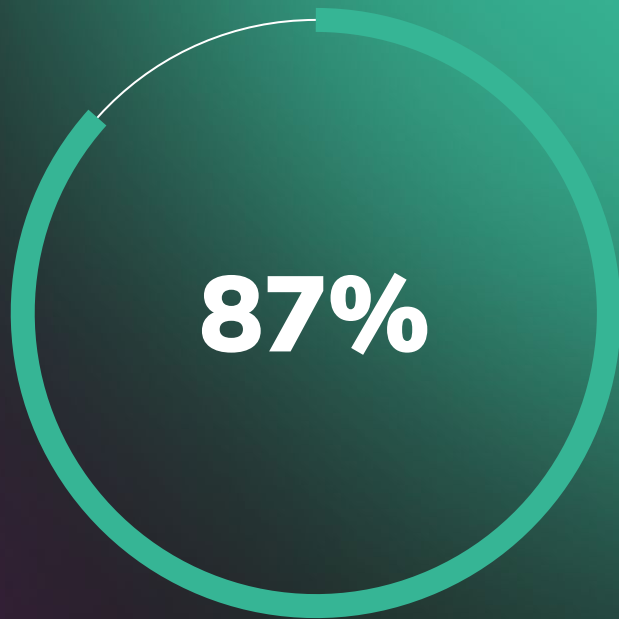

Voice

While technical aspects have previously held back Voice automation at scale, more customers are now accelerating their Voice journeys with us.

Agentic

87% of our customers have LLM features in production today, and 26% of all customer inquiries are generative

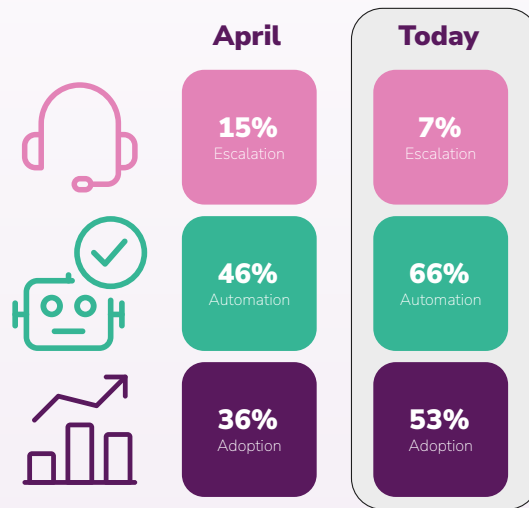

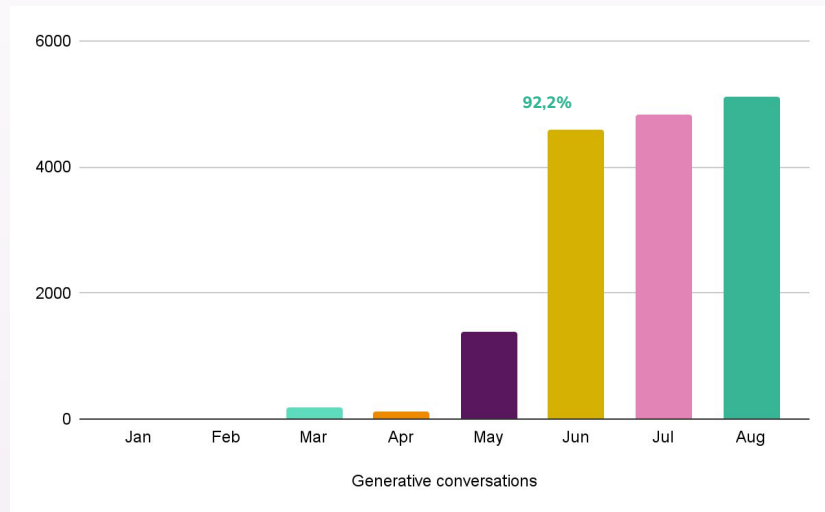

Rapid adoption of Generative AI

An interesting before/after success story

From low (<5%) Gen AI adoption to high (>90%) in 2 months:

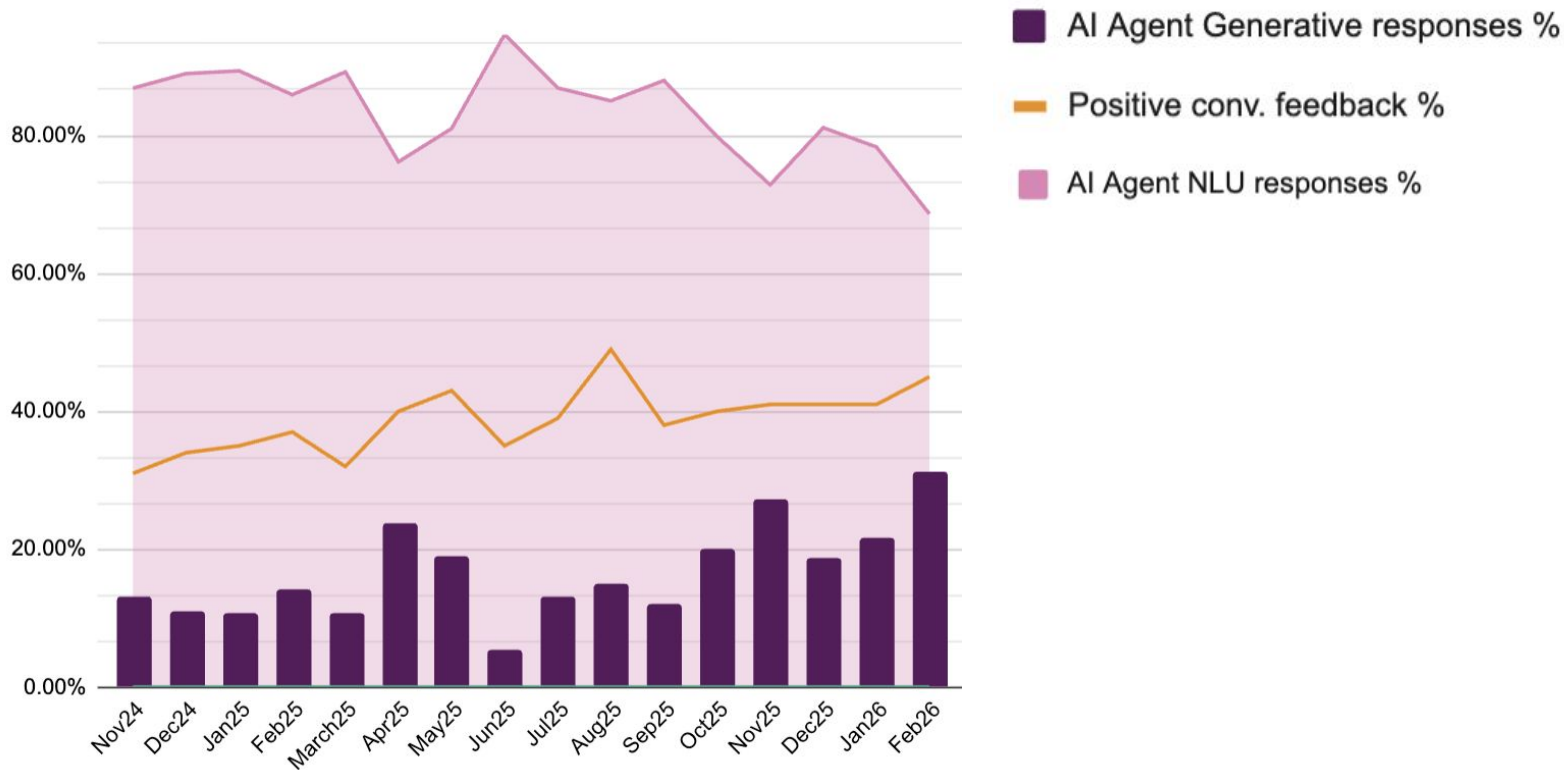

1. Human handovers went from 15% to 7%.
2. Automation increased by 20 percentage points, from 46% to 66%.
3. Adoption across all channels has gradually increased from 36% to 53%.

Soma's development after go live

Soma Nov 2024 - Feb 2026

Performance KPIs & Benchmarking

GenAI Adoption vs. Media & Telecom

The % of generated responses in conversations.

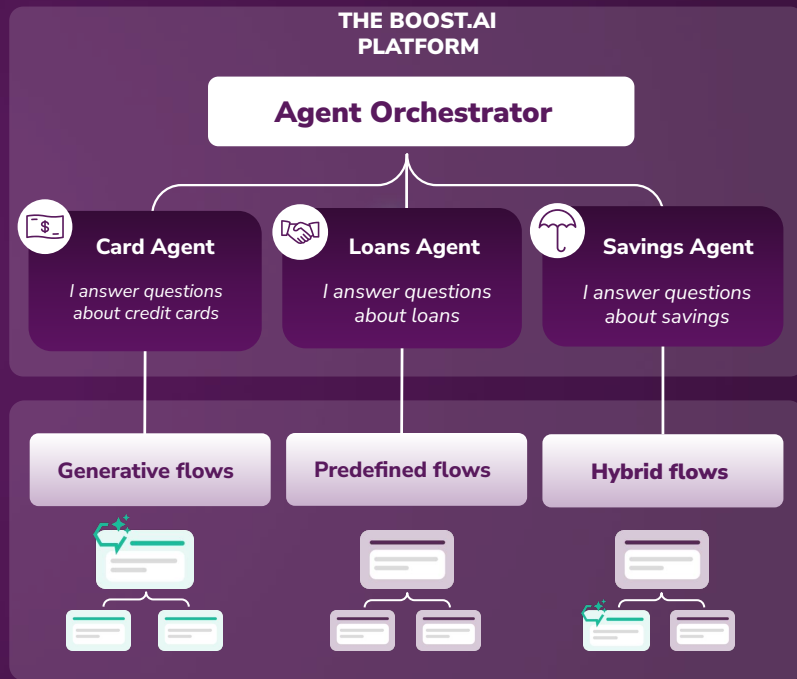

AGENT ORCHESTRATION [BETA] (12.7 - Q1)

The foundation for scalable, agentic customer experiences

Agent Orchestration uses generative AI to dynamically route conversations to the right specialized agent based on context - not fixed rules. The Agent Orchestrator also guides the conversation between agents with built-in disambiguation and contextual understanding.

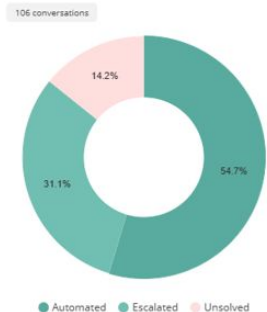

This enables more natural, scalable, and resilient customer experiences across digital channels and voice, even as conversations grow more complex.

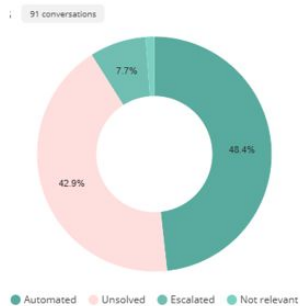

Customers are going from Generative to Agentic

An example: Swedish customer testing Agent Orchestrator

Second test Jan 23

Third test Jan 27

Fourth test Feb 11

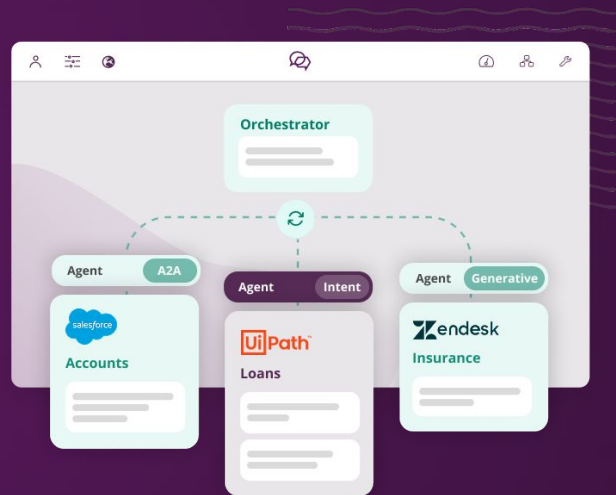

AGENT ORCHESTRATION WITH EXTERNAL A2A (Q3)

Orchestrate AI agents across platforms and vendors

Connect and coordinate external AI agents via the A2A protocol directly within the Boost platform.

This enables multi-agent collaboration across instances and vendors, allowing Boost to orchestrate complex conversations as part of a broader AI ecosystem - not just within a single platform.

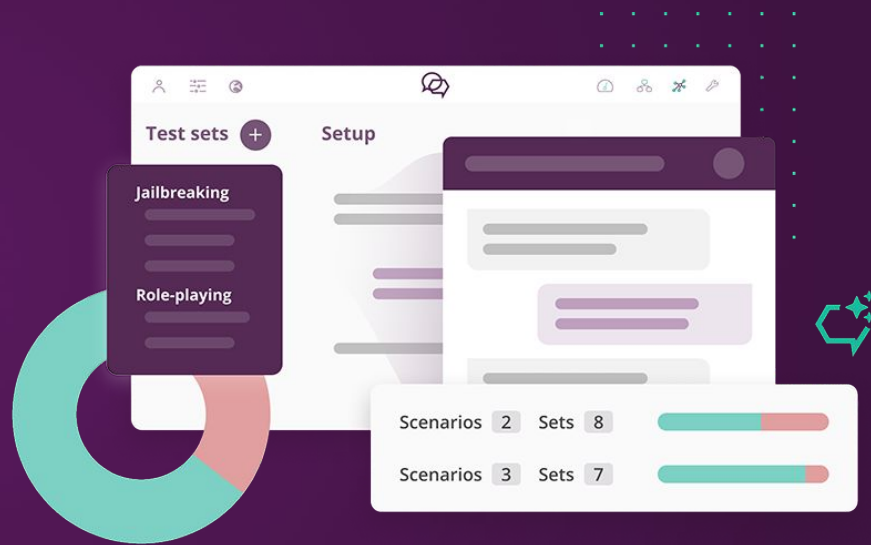

CONVERSATION TESTING V2 (Q2)

Continuously optimize knowledge for higher-quality AI Agent responses

Test end-to-end conversations - including NLU, few-shot prompts, and Orchestrator routing - at scale and over time.

Conversation Testing v2 enables teams to automatically generate, run, and track large volumes of routing and conversation tests from a single, unified Test Studio. This makes it possible to confidently validate agent behavior before and after changes, and to monitor performance as systems evolve.

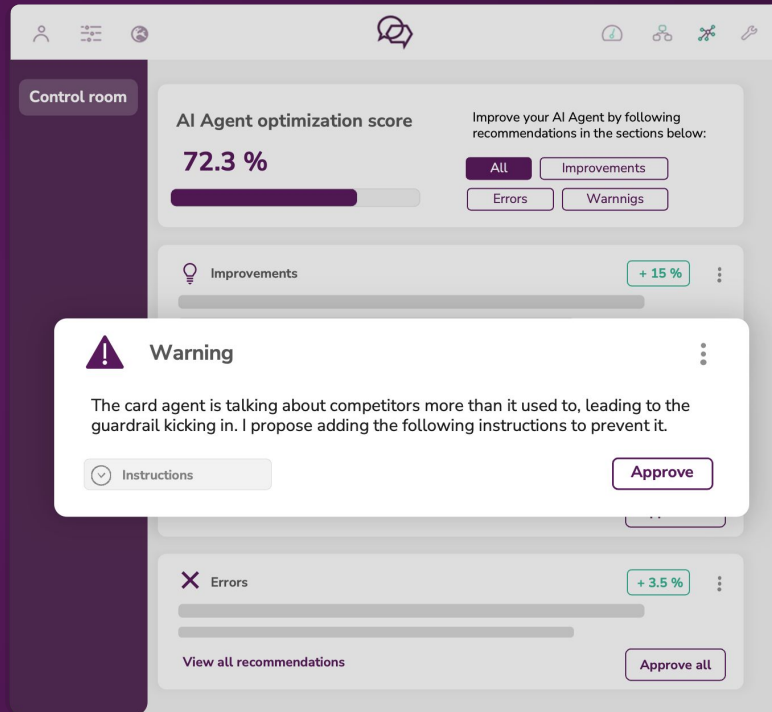

HIGH-AGENCY CONTROL ROOM (Q4)

Monitor, control, and correct agent behavior in real time

Gain real-time visibility into agentic behavior and intervene when it matters.

The High-Agency Control Room continuously monitors AI agent actions, flags potentially unwanted behavior, and recommends immediate adjustments - enabling enterprises to safely deploy agentic AI with confidence through built-in oversight and self-healing mechanisms.

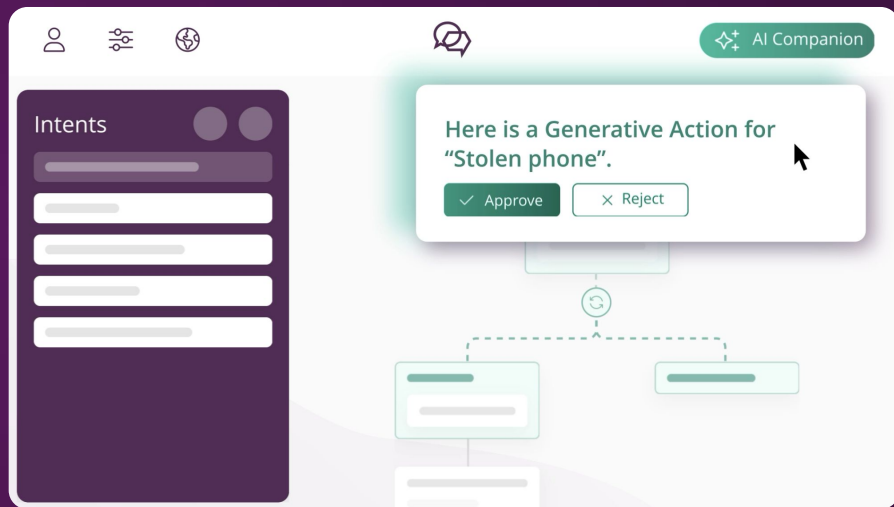

AI COMPANION FOR FLOW BUILDING (Q4)

Build and optimize conversation flows using natural language

Create, modify, and improve conversation flows by simply describing what you want to achieve.

The AI Companion for flow building lets teams build flows conversationally, apply changes instantly, and optimize tone and structure with AI-powered suggestions - reducing complexity, speeding up iteration, and making flow building accessible to more users without deep platform expertise.

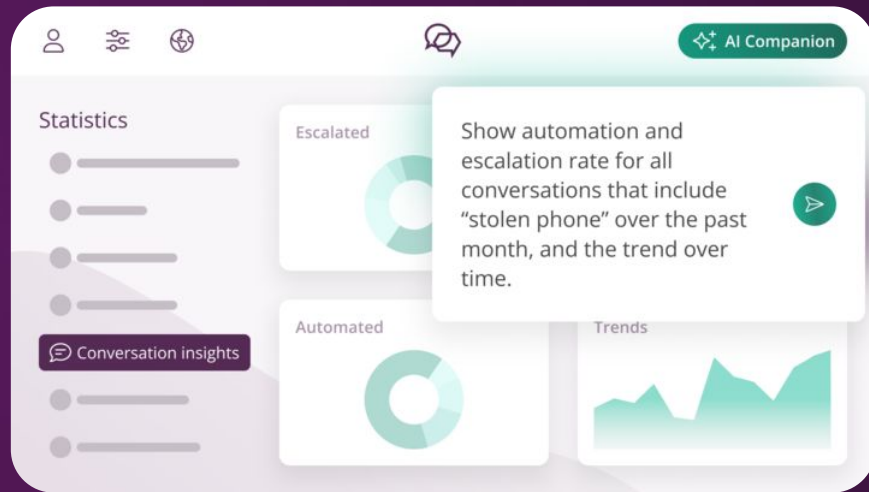

AI COMPANION FOR ANALYTICS (Q4)

Ask questions and get instant insights from your conversation data

Explore and analyze conversation data using natural language directly in the Admin Panel. The AI Companion for Analytics lets teams ask questions, generate custom metrics, and drill into results on demand - without relying on predefined dashboards, technical expertise, or data exports.

This makes advanced analytics accessible to more users and enables faster, more informed decisions.

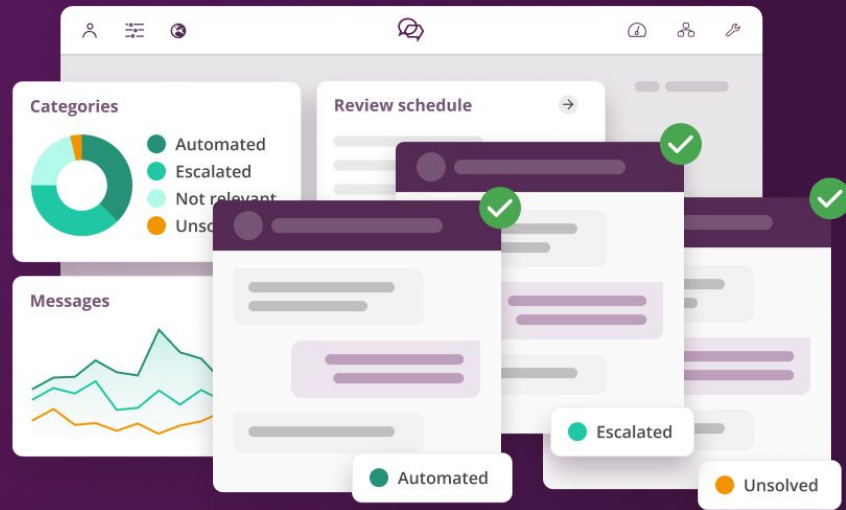

CX INSIGHTS – AI REVIEW MODEL (Q2)

More accurate AI reviews powered by a Boost-hosted model

Improve the accuracy of AI-powered conversation reviews with a Boost-hosted, fine-tuned AI Review model. Teams can manually review AI-reviewed conversations, and track discrepancies between AI and human evaluations.

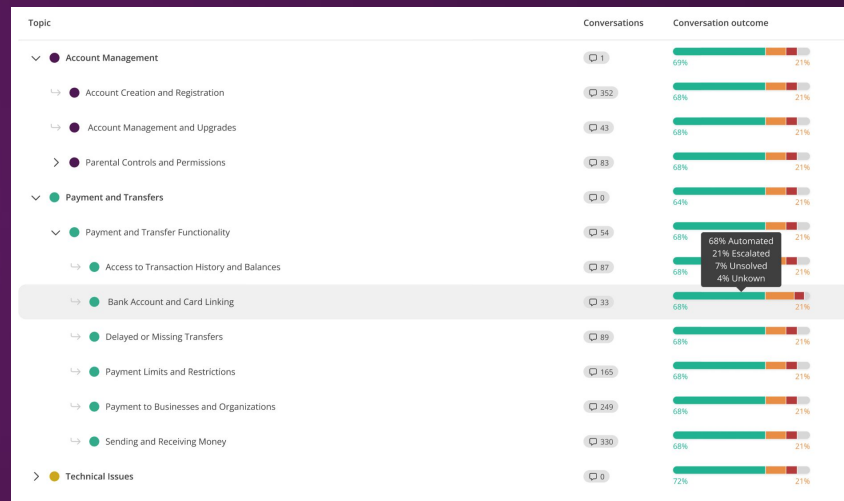

This creates a continuous feedback loop that improves review quality over time while giving teams greater visibility and control over AI-generated CX insights.

TOPIC ANALYTICS (Q2)

Topic-level insights across agentic conversations

Gain clear visibility into the topics and questions driving customer conversations, including interactions handled through Agentic Actions. Improved topic analytics shows what end users are actually asking about, giving teams actionable insight to understand demand, identify gaps, and continuously improve customer experiences as they adopt agentic AI.

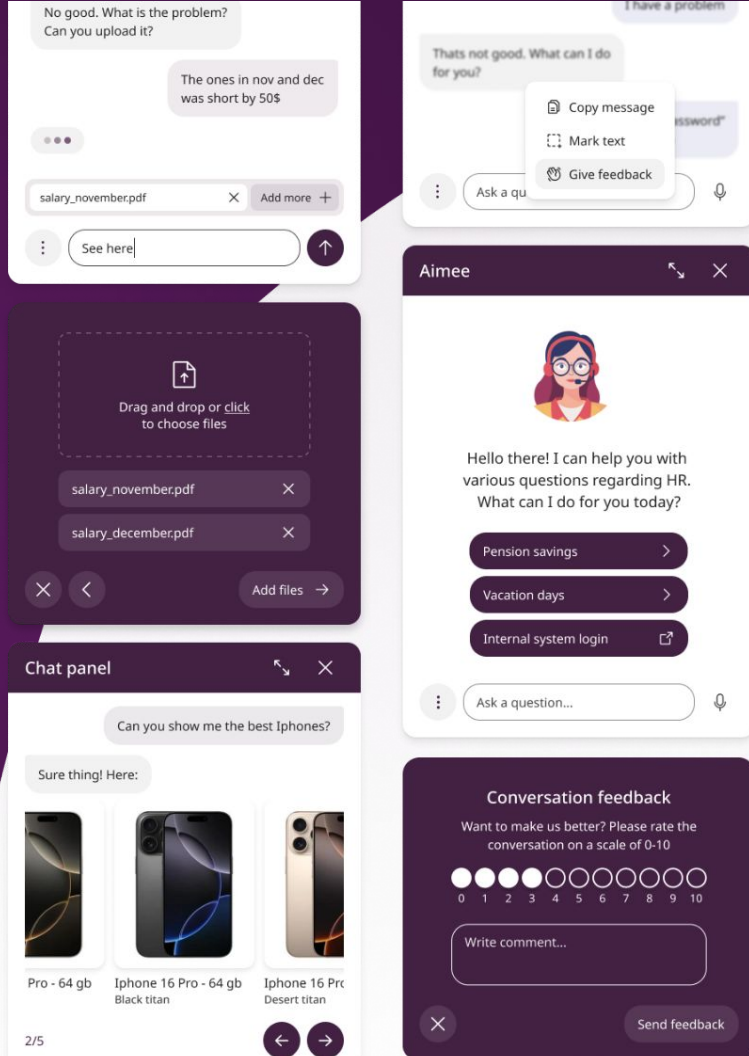

NEW CHAT PANEL WIDGET, FULL-SCREEN AND INLINE (Q3)

Chat experiences designed for agentic AI

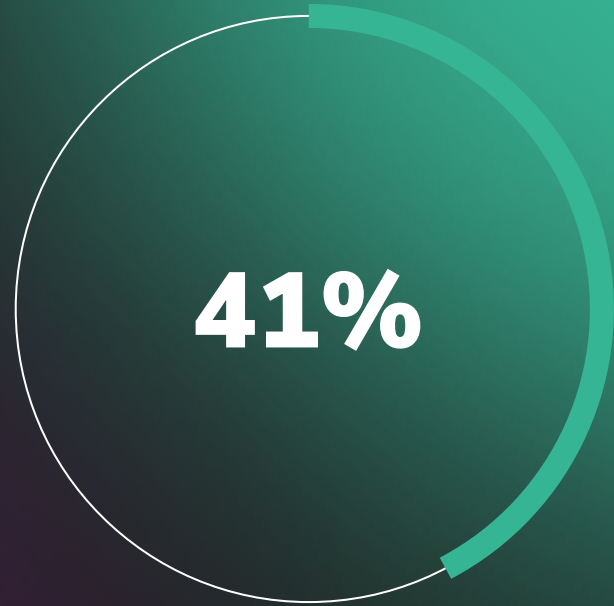

The next generation of our chat interface is designed for modern AI agents, generative responses, and asynchronous interactions.

It delivers a refreshed, flexible UI with out-of-the-box full-screen and inline options, smoother handoffs to human agents, and a new Admin Panel configuration experience that lets teams customize multiple chat panel setups without relying on frontend development.

Hei! <name> olla <name>
kyllästynyt Aamulehden
jakeluongelmiin.

Olen Aamulehti Viikko-
lehden tilaaja ja jo
kolmannen kerran
tilausjakson aikana lehti ei
perjantaina tullut.

Minkä takia lehden
jakelussa on niin usein
ongelmia? Johtuuko
painotyön siirtämisestä
pääkaupunkiseudulle?

Tilaukseni loppuu varmasti
tätä menoa
määräaikaisuuden
päätyessä...

Pahoittelen, että
Aamulehden jakelussa on
ollut ongelmia.

Nopeimmin ja jonottamatta
tarkistat tilauksesi
jakelutilanteen ja ilmoitat
jakeluhäiriöstä Oma
Sanomassa, kun lehtesi
jaetaan varhaisjakelussa.

Tarkista jakelutilanne

Jos tarvitset lisätietoja tai
apua jakeluasioissa, voit
ottaa yhteyttä lehtesi
jakelupäivystykseen. Löydät
yhteystiedot klikkaamalla
alla olevaa painiketta ja
valitsemalla sen jälkeen
tilaamasi tuotteen.

Jakelupäivystys

Katso ohjeet <name>
päiväjakelun
jakeluhäiriötilanteeseen alla
olevasta painikkeesta.

Postin päiväjakelu

olen saanut sähköpostilla laskun, mutta minulla ei ole tilausta

Asiakaspalvelumme auttaa sinua mielellään.

Ota yhteyttä.

Palveluneuvojamme eivät ole juuri nyt saatavilla.

Lähetätkö tähänastisen keskustelumme

Hei, olen Sanoman asiakaspalvelubotti Soma. Käytän apuna tekoälyä.

Näen asiakkuuteesi liitetyt seuraavat tilaukset ja laskut:

- Tilaus 00033344 Digi-lehti HS
- Lasku 000555123 (avoin, 45,40€)

Miten voisin auttaa sinua tänään?

Olen kyllä saanut tuon laskun, mutta en näe tilausta, enkä pääse lukemaan lehteä.

Katsotaanpas.

Tilauksesi ei ole yhdistetty Sanoma-tiliisi.

Koska tilaus on uusi, sinulla pitäisi löytyä **sähköpostista Aktivointi-linkki**, jolla saat tilauksesi yhdistettyä Sanoma-tiliisi.

Tässä tilauksesi tiedot:

- Tilaus tehty: 20.3.2026 / Puhelinmyynti
- Sähköposti: xx@gmail.com
- Asiakasnr: 123

Voinko auttaa sinua vielä?

Integrations | Invoice explainer - Why I got an invoice (3)

Minulta laskutettiin vaikka tilaus on irtisanottu

Ymmärrän, että haluat kysyä luottokorttiveloituksesta tai saamastasi laskusta. Asiakaspalvelumme auttaa sinua mielellään.

Ota yhteyttä. >

Fixed prices on your invoice apply for more than one month

The invoice applies to mobile number [REDACTED] and covers the period from 20.06.2025 to 31.08.2025. It includes the subscription "[REDACTED]" with an amount of 896.97,-. The invoice may seem higher than expected because it covers more than one month. Future invoices will normally apply for one month, unless changes are made to the subscription.

Hei! <name> olla <name>
kyllästynyt Aamulehden
jakeluongelmiin.

Olen Aamulehti Viikko-
lehden tilaaja ja jo
kolmannen kerran
tilausjakson aikana lehti ei
perjantaina tullut.

Minkä takia lehden
jakelussa on niin usein
ongelmia? Johtuuko
painotyön siirtämisestä
pääkaupunkiseudulle?

Tilaukseni loppuu varmasti
tätä menoa
määräaikaisuuden
päätyessä...

Pahoittelen, että
Aamulehden jakelussa on
ollut ongelmia.

Nopeimmin ja jonottamatta
tarkistat tilauksesi
jakelutilanteen ja ilmoitat
jakeluhäiriöstä Oma
Sanomassa, kun lehtesi
jaetaan varhaisjakelussa.

Tarkista jakelutilanne

Jos tarvitset lisätietoja tai
apua jakeluasioissa, voit
ottaa yhteyttä lehtesi
jakelupäivystykseen. Löydät
yhteystiedot klikkaamalla
alla olevaa painiketta ja
valitsemalla sen jälkeen
tilaamasi tuotteen.

Jakelupäivystys

Voisinko auttaa muuten?

What we want from the BR

- ◆ Build relationship to Jari
- ◆ Get them excited (to book new meetings after the BR) + align with the goals (are the goals in 2024 still valid?)
- ◆ **GenAction adoption (has been staying in 20-29%) - Align a plan!**
- ◆ Other specific topics to include
 - Personalisation: GenActions & Integrations
 - How to handle knowledge (Salesforce Knowledge connector) - asked by Jari
 - (HC: How to handle human handovers and queues to humans more efficiently by boost human chat features)
 - Should we modify the model to use GenActions & filters

A man with short brown hair, wearing a light blue denim shirt and large black headphones, is smiling while looking at his smartphone. He is sitting at a wooden table in a cafe or office setting. In front of him is a silver laptop. The background shows a blurred interior with shelves, a menu board, and other people.

Human Handover & Voice

Voice

Over the last year, our customers are automating 4-5 times more customer interactions over Voice, as tech matures significantly.

Norwegian Media company automate 51% of incoming calls

Can I pause my paper

Where is my paper

Can I get access for one day

How much is next payment

When is next payment

What papers do I have

Do you deliver in vacation

Payment info

KEY METRICS

51% automation (after 2 weeks)

40K conversations yearly

Covers 400+ questions

Industry: Media

Location: Norway

Size: 5000 employees

Challenge:

They aimed to eliminate the \$200,000 annual cost caused by customers calling in about missing papers.

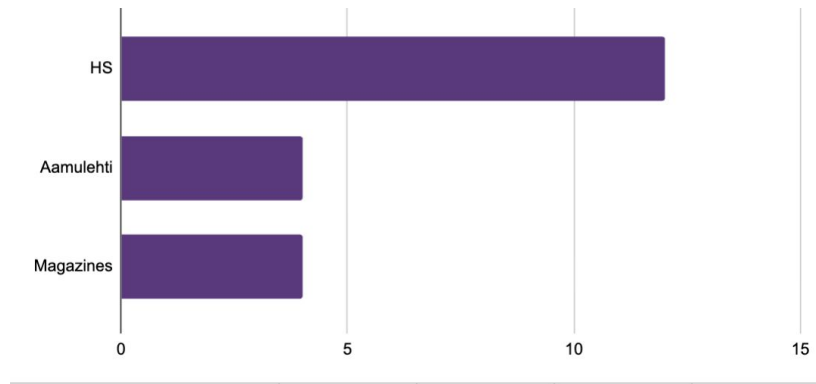

Solution:

The system identifies the subscriber by phone number and issues compensation if the paper was not delivered. It also sends a proactive message if a delay is known.

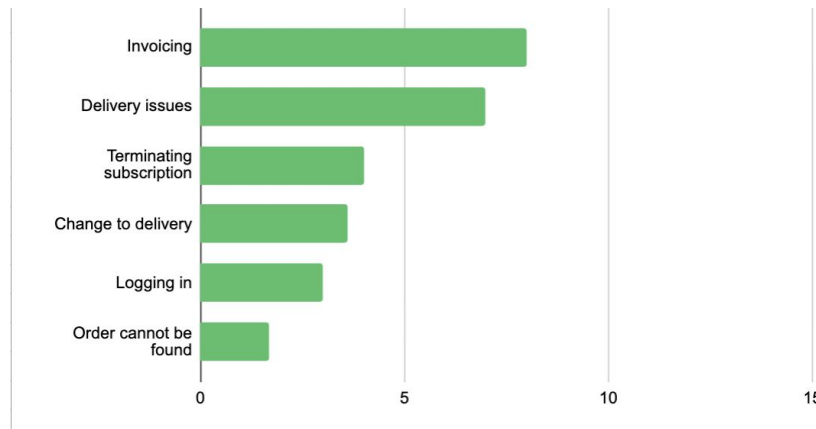

Most asked questions over the last year (%)

Positive Conversation Feedback & GenAction Adoption - Finland

% Positive Conversation Feedback (last 30 days)

PREP SLIDES

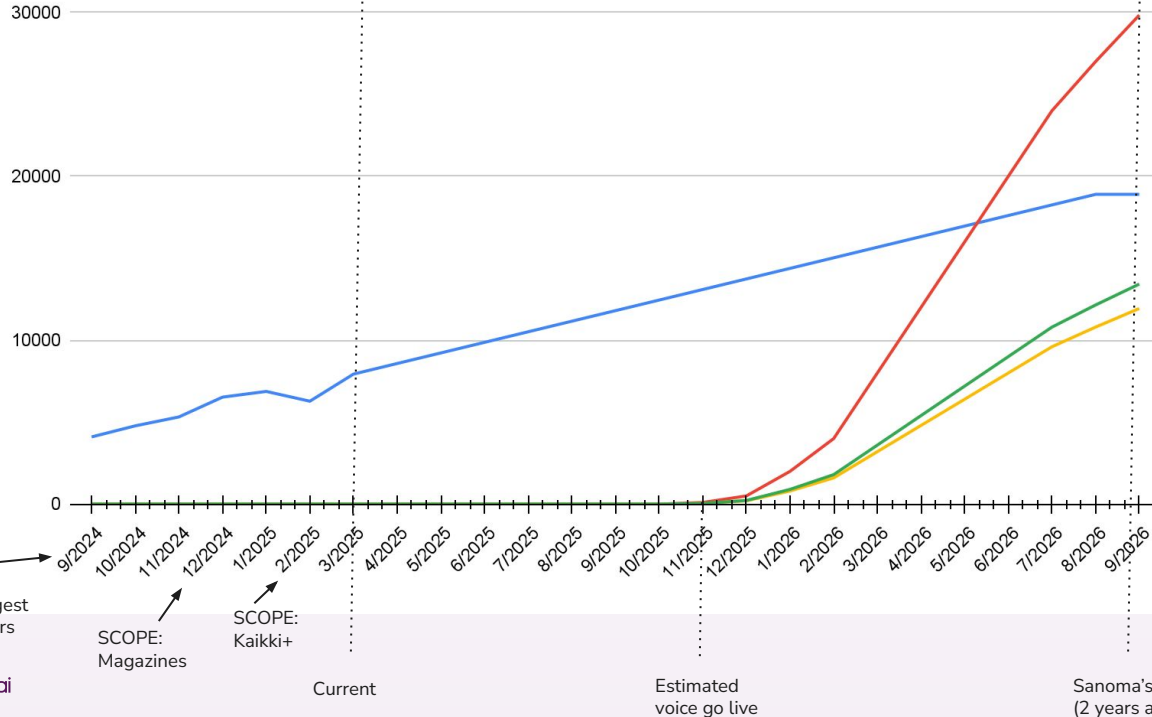

What we want from the BR

- ◆ Build relationship to Jari
- ◆ Get them excited (to book new meetings after the BR) + align with the goals (are the goals in 2024 still valid?)
- ◆ **GenAction adoption (has been staying in 20-29%) - Align a plan!**
- ◆ Other specific topics to include
 - Personalisation: GenActions & Integrations
 - How to handle knowledge (Salesforce Knowledge connector) - asked by Jari
 - (HC: How to handle human handovers and queues to humans more efficiently by boost human chat features)
 - Should we modify the model to use GenActions & filters

Sanoma: Automation - path to the target

Path to 70% automation target in 2026 - estimated growth

Chat Voice predictions Escalated to phone(40%) Voice automation (45%)

Status of the account

Latest actions:

- **HC: Fixes (Oct-Feb): Human escalation unstable (in GenActions) - SUVI supported**
- **Genesys: Meetings on autumn: Jari wanted a new feature for queue handling**

Strengths

- Early GenAction adoption, May 2024
- Integrations in place (Subscription API)
- Good health score

Weaknesses

- **“No development” after the go live**
 - Volumes staying the same
 - GenAction adoption staying the same (29%)
 - No integrations used in GenActions
- **New owner Jari: No engagement**
- No regular meetings in calendar

Actions

- ◆ Sync with Jari before BR
 - Ask about the current goals / possible changes to the 2024 goals
 - Any specific topics they wish us to cover
